

## Drawers

### Options:

- **Lightweight aluminium drawers**
- **Powder coating in all colours**
- **Embossed logo**

Driesen offers drawers in a range of heights, weights, colours and materials.

- Aluminium drawers
- Lightweight aluminium drawers
- Polypropylene drawers
- Vario Drawers

## Aluminium drawers

The aluminium drawers are supplied in Atlas and KSSU design, and a variety of lightweight versions.

The drawer is constructed of anodised aluminium with inside and outside welded corners for maximum strength. The sides are equipped with nylon slide strips for low friction and easy glide.

The drawers can be customised by embossing a logo or placing a placard on the front face or by powdercoating the drawers.

## KSSU drawers

The KSSU definition provides four different aluminium models in a range of heights: 80, 110, 140 and 170 mm.

The upper edge has an anti-tilt provision, interfacing with the intermediate runner in the KSSU trolley's side panel.

## Options

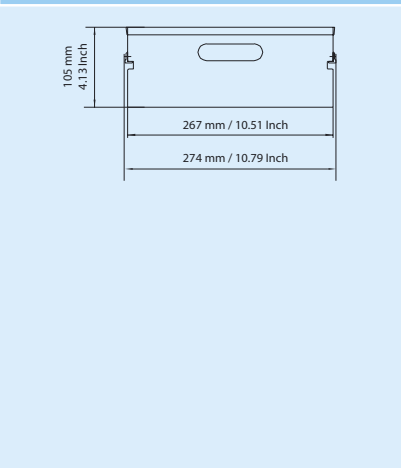

- **Lightweight aluminium drawers**
- **Powder coating in all colours**
- **Embossed logo**

## Vario Drawers

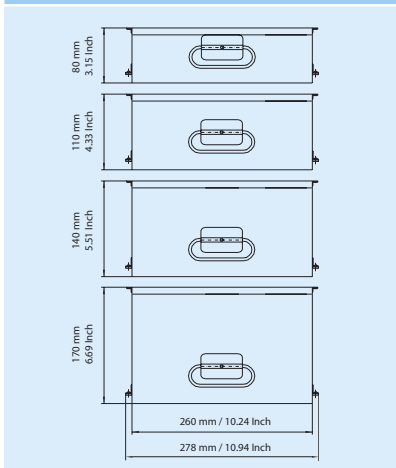

The same flexibility for Atlas definition is provided with the patented Driessen Vario Drawers.

Available in 30, 60, 90 and 120 mm height, these polypropylene drawers have runner guides at 30 mm intervals enabling the use of each of the 28 runners in the trolley. This makes it possible to mix and match drawer combinations, ranging from seven 120-mm drawers to 27 30-mm drawers, to address your specific requirements.
